Scott and Dave,

I have discussed approval of the CPT portion of the Work Plan with Joyce Ackerman. We would like to see some changes to the respiratory protection and decontamination procedures described in the current version of the Work Plan prior to an approval. We will get you an e-mail describing these changes ASAP.

Thanks,

Craig

Has there been any additional news on whether or not the CPT and dilatometer testing can be performed

according to the provided work plan? The CPT Contractor has an available spot on Friday, July 2nd and I would like to take advantage of it, if at all possible...the CPT contractor is sometimes difficult to schedule...

All,

See the email messages below from Craig Barnitz (Utah DERR) and Joyce Ackerman (EPA Region 8). Joyce is currently in the gulf (helping with the oil spill) but has given approval to use the Refraction Microtremor (ReMi) and Resistivity method ("as is" with no additional controls or considerations, Good News!). I had a chance to speak with Craig today and he is working on drafting a formal letter outlining this approval. He and Joyce will continue to discuss the Cone Penetration Soundings (CPT) and Dilatometer Testing (DMT) Equipment methods and get back to us shortly. In the interim, it appears PSI could get started with the ReMi method ASAP (However, you may want to have the official letter before moving forward). Feel free to contact me with any questions or concerns.....

Dave,

Attached is a copy of the e-mail from Joyce Ackerman (EPA). I will consult with Joyce to determine what other measures may need to be addressed before approval of the Cone Penetration Soundings (CPT) portion of the PSI Work Plan can be issued.

Thanks,

Craig

Hi Craig - I finally had a chance to review this. It's been a crazy week over here!

I concur with you that this should have very minimal soil disturbance. Do you want to go ahead and issue the approval?

I am headed to the Gulf for some beach cleanup, but I will take the other work plan with me that David Wilson submitted and hopefully I will have a chance to review it.

Thanks!

|Fwd: Work Plan

>-----

-|

Joyce,

Here is a copy of the Work Plan I talked about in the voicemail. The Work Plan is very basic as the geo-technical work is not very intrusive and will likely not intrude into areas beyond the 12" cap at the site. I believe they would like to get quick feedback on this portion of the work so give me a call after you have a chance to review.

Thanks,

Craig
